

Places & Spaces

Figure 3.1 The proportion and size of chronically poor populations in world regions

The [Places & Spaces](#) “exhibit has been created to demonstrate the power of maps. An initial theme of this exhibit is to compare and contrast first maps of our entire planet with the first maps of all of science as we know it.” I’m pretty interested in maps and [this concept map](#) that shows the world in relation to it’s areas of poverty really stood out and begged to be looked at more closely. Definitely a site I’ll be coming back to again and again. [\[via\]](#)
