Mapping Science Workshops

SLIS faculty member **Katy Börner** presented a talk at the "New Horizons in Internet Site Development" workshop held at the Cold Spring Harbor Laboratory in New York, on October 22-25, 2006. Her invited talk was entitled "**Mapping the Structure and Evolution of Science Locally and Globally.**" Börner discussed the advantages and the process for mapping science. She also presented various applications of mapping knowledge.

She opened the third day of the workshop with a presentation on "**Using Our Collective Wisdom Introduction: Supporting the Global Brain Emerging on this Planet**" arguing that "the problem is not how one person can access knowledge but how we can collectively access and manage humanity's knowledge" [Börner].

On October 26, 2006, Börner, along with Julie Smith and Stephen Uzzo, co-organized a "Workshop on Science (Weather) Forecasts" at the New York Hall of Science. The goal of the workshop was to "identify existing

and to master-mind novel maps for an exhibit on "Science (Weather) Forecasts" as part of the third iteration" of the **Places & Spaces** exhibition, co-curated by Börner and Smith.
