SLIS Faculty News

Microsoft Research Faculty Summit 2007

SLIS faculty member Katy Börner will be attending the Microsoft Research Faculty Summit 2007 from July 15-17. The summit will be held at the Microsoft Conference Center in Redmond, Washington and aims to "bring together more than 400 thought leaders from academia, government, and Microsoft to discuss both the maturing of the computing disciplines and the range of open opportunities for research and development." [Microsoft website]

According to the Microsoft Research Faculty Summit 2007 website, the summit will explore questions such as:

- What computing breakthroughs are needed to enable the next generation of mobile and embedded devices?
- In which new directions is the quest for scientific discovery taking the field of computing research?

Katy Börner is the Director of the Information Visualization Lab and the Cyberinfrastructure for Network Science Center.
