NetSci 2007 — Visualizing Network Dynamics Competition

SLIS faculty member **Katy Börner** is one of the organizers of **NetSci 07** — International Workshop and Conference on Network Science held May 20-25, 2007, in New York City.

Network science is "an emerging, highly interdisciplinary research field that aims to develop theoretical and practical approaches and techniques to increase our understanding of natural and man-made networks." The aim of NetSci07 is to "bring together leading researchers, practitioners, and teachers in network science (including network analysts, modeling experts, visualization specialists, and others) to foster interdisciplinary communication and collaboration." [NetSci07 website](http://www.sis.indiana.edu/news/story.php?story_id=1448)

As an integral part of NetSci07, the "Visualizing Network Dynamics" competition will invite researchers, practitioners, and educators to submit visualizations of evolving networks, activity patterns over network combinations, or a combination of the two. The competition is open for submissions April 10. To learn more about the competition visit the [Visualizing Network Dynamics competition website](http://www.sis.indiana.edu/news/story.php?story_id=1448).

Börner and Elisha Hardy, an IU's Fine Arts student and graphic designer for IU's Cyberinfrastructure for Network Science Center, are two of the competition organizers. Börner is a co-organizer of NetSci06, held at Indiana University – Bloomington.

This competition is supported in part by the Cyberinfrastructure for Network Science Center at Indiana University, the National Science Foundation under Grants No. IIS-0238261 and NSF IIS-0513676, and the New York Hall of Science. Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation.
