Scientific Method: Relationships Among Scientific Paradigms

One of the science maps commissioned for "**The Places & Spaces: Mapping Science**" exhibition is featured in a 2-page story in the SEED magazine, online at seedmagazine.com. The article – "**Scientific Method: Relationships among Scientific Paradigms**" – describes the **map** as "constructed by sorting roughly 800,000 published papers into 776 different scientific paradigms."

"Places & Spaces" is curated by SLIS faculty member **Katy Börner** and Julie Smith, Cyberinfrastructure for Network Science Center. It was "created to demonstrate the power of maps." [Places & Spaces website]

The exhibit was on display at the New York Hall of Science from December 2006 to February 2007. The next exhibit venue is the 233rd ACS National Meeting & Exposition, Chicago, IL, March 25-29, 2007.

"**Seedmagazine.com** aims to provide our readers with the most relevant, insightful and entertaining original science content on the web. ? Our overarching goal is the nurturing of a science-savvy global citizenry by increasing public interest in and understanding of science." [www.seedmagazine.com]
